Ending

Quote, poem or some type of message to your baby

Instructions for getting project ready for book and video

- Once you get all your pictures and video clips together, number them in the order you want them to appear (if digital rename them that number) on video or in the book.
- On a separate piece of paper or in a email write out titles or stories that you want to go with pictures, or sections of pictures. Tell the number of the picture you want the title placed on.
- Write down song titles and artist you want to use for your video. Instruct which pictures you want for the songs you have chosen.
- If the pictures are all digital, place them all in one file and then zip it. We will give you a link to upload the file to.
- If you have printed and digital, number the pictures on the back and then name the digital pictures in order of where they need to be placed within the printed pictures. Printed pictures should be placed in large zip lock bags for transport. This allows them to remain clean and all together.
- If you have video files, rename them with a number of where they are to be placed among the pictures. Send each video file separately from the pictures. To upload they must be under 2 GB. If mailing them, you can include them on flash drive or on tapes. There is an extra charge for transferring tapes to digital
- Call us for further instructions when you have your pictures and video ready to go.

Optional video or book for expecting parents

Are you expecting? We have a create as you go baby package. Each month you can send us your pictures and video clips for your book and video. We create a book or video as you send them and you watch the progress on a private link we provide for you. At the end of the year we send you the finished product in a DVD or printed book.
